ACKNOWLEDGMENTS

THE MANAGEMENT OF THIS EXHIBITION HERE RECORDS ITS SENSE OF INDEBTEDNESS TO THOSE ARCHITECTS AND ARTISTS WHO, BY GENEROUS CONTRIBUTIONS OF THEIR WORKS YEAR AFTER YEAR, MAKE POSSIBLE THESE EXHIBITIONS, AND THEREBY LEND THEIR AID TO A POTENT FACTOR IN THE HEALTHY GROWTH OF ARCHITECTURE AS A FINE ART, TO THE MANAGEMENT OF THE PENNSYLVANIA ACADEMY OF THE FINE ARTS FOR THEIR COURTESY IN EXTENDING THE USE OF THEIR GALLERIES AND FOR THEIR HEARTY CO-OPERATION IN THE WORK OF PREPARING FOR THE EXHIBITION.

TO THE ADVERTISERS, THE OFFICERS AND THE MEMBERS OF THE T SQUARE CLUB AND PHILADELPHIA CHAPTER, AMERICAN INSTITUTE OF ARCHITECTS DESIRE TO EXPRESS THEIR APPRECIATION OF THE LIBERAL SUPPORT WHICH HAS GONE FAR TOWARD MAKING THE PUBLICATION OF THE CATALOGUE POSSIBLE.

ANNOUNCEMENT

A NUMBER OF THESE BOOKS ARE RETAINED FOR SALE, AND WILL BE FORWARDED, POST PAID, UPON RECEIPT OF ONE DOLLAR. CATALOGUES OF PREVIOUS YEARS CAN BE OBTAINED BY ADDRESSING THE SECRETARY OF THE T SQUARE CLUB.

THE WALTER COPE MEMORIAL PRIZE

Endowed in the memory of the late Walter Cope. This prize is awarded annually by the T Square Club to the winner of a competition in Municipal Improvement or Landscape Architecture. It is of a value of about seventy-five dollars, the sum being expended in Architectural books chosen in consultation with the Executive Committee of the T Square Club.

PROGRAMME OF THE FIFTH COMPETITION

DRAWINGS DUE MARCH 30, 1908

A Monument at the Entrance of the Harbor

It is snpposed that as a part of the improvements of the Harbor of Philadelphia, a monument is to be erected on one of the islands of the Delaware River, to mark the entrance of the city for those arriving by steamer.

The Statue of Liberty meets such a purpose for the City of New York, but in the present case no suggestion is made as to the natnre of the monument, which can be either a monumental figure or a pylon, or whatever decorative structure may seem best suited.

The island can be completed and shaped by retaining walls. Its maximum dimensions cannot exceed 200 x 100 feet. A small landing is to be provided for visitors.

Drawings required: Plan at one thirty-second inch. A front or side elevation, optionally, at one-eighth inch. The two drawings on a single double Elephant Whatman sheet.

The award will be made by the Exhibition Committee of the 14th Annual Exhibition, and their decision will be announced at the opening of the Exhibition, April 13, 1908, at which time all drawings will be exhibited.

THE JOHN STEWARDSON MEMORIAL SCHOLARSHIP IN ARCHITECTURE

Founded 1897

(Prior to 1897, the Travelling Scholarship of the University of Penna.)

A committee representing the friends of John Stewardson and the admirers of his work and character, was formed for the purpose of establishing and maintaining, in his memory, a Travelling Scholarship for students of Architecture, of the State of Pennsylvania.

In 1897 this committee transferred the funds, subscribed for that purpose, to the Trustees of the University of Pennsylvania, to be held in trust, together with further moneys subscribed, and to devote and dispose of the net income thereof for the advancement of education in Architecture in perpetuation of the Memory of John Stewardson, in the following manner: To pay the income in every year, or alternate year to any person or persons who shall have studied or practiced Architecture in the State of Pennsylvania, for the period of at least one year, immediately preceding the Scholarship Award, as may be determined by the Managing Committee, for the purpose of enabling such person or persons to pursue his, her, or their architectural studies, either in the United States, or in other Countries, as may be deemed best by the Committee.

The Managing Committee consists of one member of the Board of Trustees, of the University of Pennsylvania, one member of the Corps of Instruction of the School of Architecture of the said University, named by the Trustees of the University of Pennsylvania, and three practicing Architects of the City of Philadelphia, chosen or elected, one by the Philadelphia Chapter of the American Institute of Architects, one by the T Square Club of Philadelphia, and one by the four other Members of the Managing Committee. This Committee has the sole power to regulate the disposal and payment of the income, or of any additions thereto up to One Thousand Dollars; to determine the terms and methods of its use and to formulate, adopt, supervise and enforce the necessary rules governing the place and manner of the competition for said Scholarship.

The Managing Committee of the John Stewardson Memorial Scholarship in Architecture, announces by authority of the Trustees of the University of Pennsylvania, the eleventh competition for a scholarship of the value of One Thousand Dollars, the holder of which is to spend one year in travel and in the study of Architecture in Europe, under the direction of the Committee.

Candidates must be under thirty years of age, and are required to pass the following Preliminary Examinations: Freehand Drawing, History of Architecture, Construction and Language.

Graduates of any of the recognized Schools of Architecture will be exempt from the Preliminary Examinations.

James P. Jamieson	1893	Percy Ash	1895

"Standard"

Porcelain Enameled Plumbing Fixtures

have stood the most exacting tests of over twenty-five years for durability—have received the highest awards in competition with all other makes for beauty of design and finish—and conform to every law known to make them perfectly sanitary.

"Standard" Ware has been specified by discriminating architects and builders all over the world not only because it comprises the most beautiful and most sanitary fixtures made, but because every piece of **"Standard"** Ware is guaranteed. Every genuine **"Standard"** fixture carries our "Green and Gold" Guarantee Label. Its presence not only assures you that you are getting the best, but is a protection against the substitution of inferior makes.

NEW HEINZ ADMINISTRATION BUILDING PITTSBURGH, PA.

The latest building that has been added to the group or fine structures belonging to the H. J. Heinz Co., of Pittsburgh, is the one shown here.

It is their new Administration Building and its very elegance shows the care this well known industrial institution gives to the construction of its buildings.

"Standard" plumbing fixtures were used throughout, as these fixtures have proven themselves to be the most durable and most satisfactory in every instance where cleanliness and sanitation were the most important requisites.

OUR ATTITUDE TOWARD THE ARCHITECT

When the Architect lays before us his plans and designs for a greenhouse or a conservatory, we go over them carefully with him, suggesting only such possible changes as either the success of plant life or certain construction limitations prompt. The spirit of the design is preserved, and every horticultural requirement considered. To this end, our relations with the architect have always been most cordial, and on this basis we seek additional business.

BURNS'
IMPROVED CEMENT COATING
THE IMPROVED PAINT
FOR BRICK, CEMENT, CONCRETE, STUCCO AND PLASTER

BURNS' IMPROVED CEMENT COATING is an Oil Paint, containing no white lead, that will retain its snow-white surface, without turning YELLOW, under the fumes of acids and gases.

It is *Not a Water Paint*, and contains nothing in its composition that is used in making these paints, and when applied to a damp surface, will dry out hard and white, leaving a surface without gloss, that will not crack, scale, peel or mildew.

It will not ignite when once dry, if flames should strike its surface, and is therefore a *fire retardent*.

It is non-absorbent, and will not change color if its surface is wet.

It is not effected by steam, or water originating from condensation.

These are points that will readily be recognized as especially advantageous and of value.

MONOGRAM IN TOWER OF CONCRETE STONE, CHRIST CHURCH, WEST HAVEN, CONN.
CRAM, GOODHUE & FERGUSON, Architects

The attention of architects is called to specimen stones in this exhibition. No secret process is used in the production of this stone, our standard stone being simply moulded concrete similar to the material used in foundations and footings, except it contains about three times the proportion of cement, and automatically mixed, with a care impossible unless in a plant equipped like ours. That the material is more enduring than limestone, can easily be shown.

We also produce concrete composed of white quartz and white cement, with one quarter of one per cent. of yellow ochre, in successful resemblance to caen stone. The cold grey which is necessarily present in standard cement is lacking in this material.

WAWASET LIMESTONE

Made by

The DIAMOND STONE BRICK CO.

WILMINGTON, DEL.

A stone which resembles natural limestone. Is not a cement product. It does not discolor. Is treated same as a quarry stone. It is carved, cut or tooled in same manner with same tools as Indiana limestone. Its color, texture and structure are similar to Indiana limestone. Is from 20 to 30 per cent. cheaper than Indiana limestone. Has greater strength and less permiability than many natural stones.

Burnt Clay

It is beyond the imagination of any not familiar with the clay industry to grasp the full meaning of the Artistic or Architectural possibility of this product. The endless variety of shapes in our Bricks, with over one hundred colors to select from, makes it possible for the Architect or his client to select and procure from the samples in our show rooms any combination desired.

In order to render the same intelligent co-operation in the selection of Terra Cotta as we give in the selection of Bricks, we have established our own Terra Cotta Works at Crum Lynne, Pa., where we have every facility for the making of Artistic Terra Cotta and under conditions so favorable as to make the lowest prices possible, in addition to prompt shipments to all points.

EX-GOVERNOR HILL'S MANSION AT BANGOR, ME.

¶ This chaste and beautiful building is one of the many structures in which our high grade Telephones and Annunciator devices have recently been installed. Our factory designed for the above Mansion a 16 station selective ringing common talking Flush type telephone system, instruments having metal face finished in dull nickel.

¶ The Electrical parts of these instruments are of the same high grade as those we furnish to the largest Telephone Exchanges in the United States.

¶ We refer to the following prominent buildings and business houses using our apparatus:

Plaza Hotel, New York
Bellevue-Stratford, Philadelphia
Union Trust Co., Washington
Bureaus of Agriculture and Geological Survey
Girard College, Philadelphia
Forrest Theatre, Philadelphia
Hudson River Tunnels, New York
Inter-borough Railroad Company
Pennsylvania Railroad Company
American Ice Co., Philadelphia
Lehigh Coal & Navigation Company
Oliver H Bair Company, Philadelphia
and many others

¶ We design and equip Telephone, Annunciator and Fire Alarm systems; our Engineers and services are at your command.

¶ Descriptive bulletins, etc., on request.

1020 WALNUT STREET, PHILADELPHIA, PA.

NOTICE TO ARCHITECTS

Our proposition simply stated means that we are prepared at the present time to furnish power and light for all classes of buildings, being or about to be erected in Philadelphia, for less money than it will cost the owners to generate Electricity with a private plant.

Hotels or Apartment Houses, Restaurants or Clubs, Public Buildings or Office Buildings, Stores or Dwellings, will receive greater satisfaction, and better service, at less cost, from The Philadelphia Electric Company than they would by the installation of an isolated plant.

Every Architect owes it to his client to obtain estimates for Central Station Service before contracting for power installations of any character.

MAKIN TRADE HEATING MARK KELSEY

ZIG-ZAG

HEAT TUBES

form the fire pot and combustion chamber of the

KELSEY WARM AIR GENERATOR

and heat the air, heat more of it with less fire and greater economy than any imitation of it with straight tubes.

ZIG-ZAG HEAT TUBES

increase the heating surface and weigh over 25 per cent. more than all imitations and are guaranteed against any defect, with proper usage, for five (5) years.

ZIG-ZAG HEAT TUBES

the exclusive feature of the Kelsey, are the reason why it heats the same amount of air with a banked fire as the best imitation of it does with a forced fire, thus allowing a full supply of fresh air at night when the house is closed. This fact alone should recommend it to any one who appreciates the value of ventilation

The original and genuine KELSEY WARM AIR GENERATOR has been tested since 1889 in over 33,000 Residences, Schools and Churches.

NOVELTY

WARM AIR SYSTEM OF HEATING AND VENTILATING

It is important to heat a building properly. It is even more important that it be properly ventilated. Not one residence in ten thousand is healthfully ventilated. It will some day be considered a crime to construct a human dwelling without any formal scheme for renewing the air in it.

Architects are beginning to realize the importance of ventilation, but indirect steam and water plants are too costly for most residences, and so the unhealthful, unsanitary method of heating by direct radiation continues to be installed in many residences.

The Novelty System solves the problem. It has every advantage of indirect steam or water heating and systematic, adequate ventilation in addition. It costs no more than direct steam if the building is properly planned for its installation. It is cleanly and efficient. No case of failure has ever attended its operation.

Our Novelty Furnace Handbook is the textbook of the Novelty System of Heating and Ventilation. This is the only treatise ever published that gives architects definite, positive, authoritative rules and directions for planning and specifying a correct warm air system of heating *and ventilation*.

We make Novelty Furnaces that are absolutely and permanently gastight. We make them in greater variety of sizes and in larger capacities than any line produced elsewhere.

We invite architects to study the merits of the Novelty System for the promotion of perfect heating and healthful ventilation. Write for our Handbook.

PETRIFAX

A coating for brick or cement walls, when for any reason they are not to be left natural. Petrifax insures the walls against dampness and may be applied no matter how damp the wall, if there is no pressure to force it off before drying.

PETRIFAX once dry becomes part of the surface to which it is applied, having penetrated so far that it is impossible to remove it.

PETRIFAX ENAMEL is a finishing coat which gives a hard high gloss when finished. Walls treated with "PETRIFAX" can be washed as often as desired, with soap or weak acids when for sanitary reasons absolute cleanliness is necessary.

"PETRIFAX" is white, but may be tinted any shade that is desired. It is particularly adapted for the walls of Hospitals, Laundries, Lavatories, Workhouses, Electric Light and Pumping Stations, Corridors of office buildings, etc.

FRITZ & LA RUE

ORIENTAL RUGS

We import these fabrics, unaltered by false colorings, direct. Every Rug is carefully selected by our resident buyer in the Orient.
Rugs purchased from us bear our guarantee of genuineness and proper valuation. These reasons and the fact that our buyers are not limited as to quantity, make our collection the best, not only in sterling merit, but in scope for selection.

CARPETS

Our Carpet Stock is always the exponent of the latest and best ideas in interior decoration. We make a specialty of and carry a most exclusive line of plain and self colored Carpets with borders to match.

WHOLE CARPETS

We devote special attention to the execution of orders for these which are made by hand in one piece without seams from colored designs by our own artists in the following weaves:
Indian and Turkish, Austrian and English hand tufted,
Scotch, Axminster, French Aubusson, French Savonierie.

HARD WOOD AND PARQUETRY FLOORS

As we have the largest and most thoroughly equipped plant, carry the best and most complete stock of woods of the highest quality obtainable at constant temperature and all work is by master craftsmen and guaranteed, we are enabled to execute the largest orders on short notice. Estimates and designs gladly submitted.

TARRED FELT

BARRETT SPECIFICATION PITCH

BARRETT SPECIFICATION FELT

FOR roofing and waterproofing purposes the use of Coal Tar Pitch and Tarred Felt has grown from small beginnings, fifty years ago, to almost universal adoption.

A great majority of all the first-class buildings of the country are now covered with roofs of Coal Tar Pitch and Felt, with a top surface of either Slag or Gravel, and from the standpoints of economy and satisfaction this form of roofing is far superior to any other.

HOTEL ASTOR

Roofed with Coal Tar Pitch, Felt, and Tile, as advocated in The Barrett Specification

We can point to numerous buildings covered with such roofs which have been in use for over thirty years, and have cost ***less than a quarter of a cent per square foot per year of service.***

For waterproofing cellars, foundation walls, vault arches, tunnels, and all

underground construction, Coal Tar Pitch and Tarred Felt are recognized as standard materials.

That the United States Government considers this form of waterproofing as best is evidenced by the fact that it was used in the construction of the new Custom House in New York City, which is illustrated

UNITED STATES CUSTOM HOUSE, NEW YORK CITY

Waterproofed with Coal Tar Pitch and Felt

herewith. This building is a type of the finest modern construction, and one of the most substantial owned by the Federal Government. All parts of the building underground, as well as the side walls, were made waterproof by the use of Coal Tar materials. The Government is also using this method of waterproofing in a number of new and elaborate buildings now in the course of erection at West Point and in fortification work in other parts of the country.

One of the most striking instances of the permanency of Coal Tar Pitch and Felt Waterproofing was found in the old New York Central and Hudson River tunnel, under Park Avenue, in New York City. Early in 1905, work on the new terminal improvements necessitated the tearing out of the south end of the old tunnel, which was built in 1872.

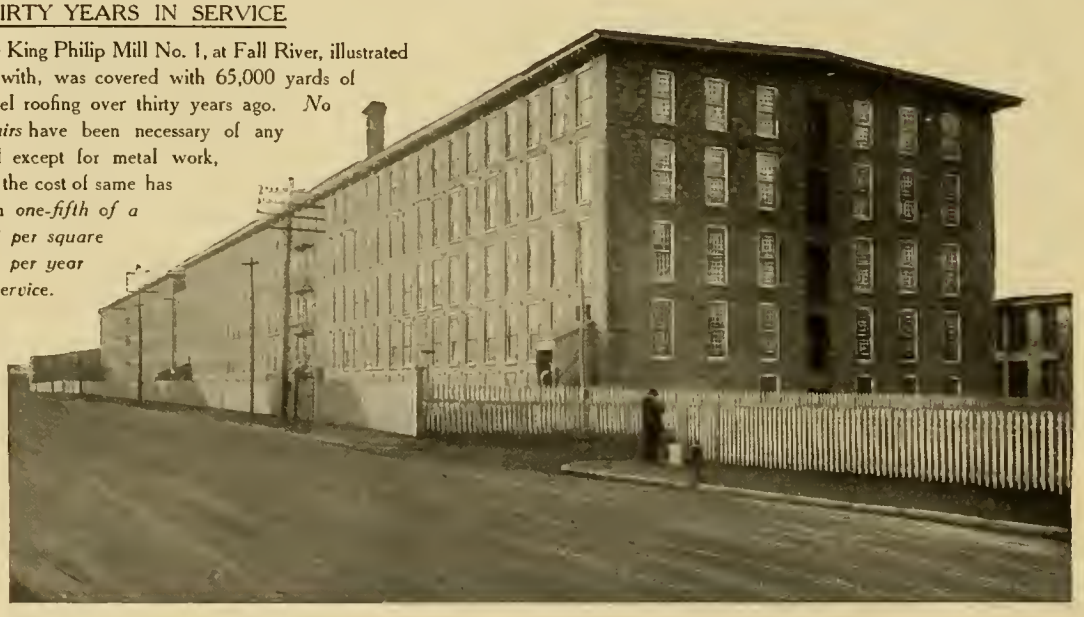
The ***thirty-three-year-old Coal Tar Pitch and Felt Waterproofing*** was found ***perfect and unchanged.***

The waterproofing materials used in the above work were manufactured by this Company, and correspond to our "Specification" Brands of Coal Tar Pitch and Felt which we recommend, as they represent the highest quality manufactured.

We should be very glad to send any one, upon request, a sample of this Felt for examination, or to forward full information regarding Coal Tar Pitch and Felt for roofing and waterproofing purposes. We have

THIRTY YEARS IN SERVICE

The King Philip Mill No. 1, at Fall River, illustrated herewith, was covered with 65,000 yards of gravel roofing over thirty years ago. *No repairs* have been necessary of any kind except for metal work, and the cost of same has been *one-fifth of a cent per square foot per year of service.*



a special service for this purpose. All communications in this connection should be addressed to the
